

HR Digaron-W 70mm f/5.6 Tilt

Rodenstock Normal XT lens

Intimate Perspective. Maximum Depth of Field.

For Landscape & Cityscape photographers, the Phase One XT 5° Tilt panel allows for greater depth of field control, utilizing the large image circle of the Rodenstock HR Digaron-W 70mm Lens. The additional depth of field control, coupled with the 12mm shift capabilities of the XT Camera, provides consistent and diffraction free focus from foreground to infinity, all in one shot.
